

opportunity to have this large accumulation of material of such interest in connection with the history of the society classified and arranged by him. Although the work has not been entirely completed, the material is now in such order as to be available for consultation and reference. The resulting good has already been more than once manifested.

The Hayden Memorial medal and the balance of the interest arising from the endowment fund were this year voted to Professor Thomas Henry Huxley, LL. D., F. R. S. to whom they have been forwarded with an expression of the Academy's hearty endorsement of the action of its awarding Committee. This is the fourth award of the Hayden memorial, the first being to Prof. James Hall of Albany in 1890, the second to Prof. Edw. D. Cope of Philadelphia, 1891, and the third to Prof. Eduard Suess of Vienna in 1892.

The Delaware Valley Ornithological Club and the Geographical Club have held their meetings throughout the year in the Academy.

These facts and figures it is believed prove without comment that the Academic year just closed has been prosperous if uneventful.

Recording Secretary.
